Hello

Thank you for your inquiry.

Yes you may have permission to use text passages from the site. I make a habit of always giving credit when I use passages from other sources, and would appreciate you giving the same consideration to any sources I may have credited.

Good luck with your project, and the best to you and your students.

Sincerely,
Charles Thompkins

Subject: Request to use information from your website in an educational project

Dear Mr. Thompkins,

I would like to ask for your permission to use some text passages from your website in an educational project.

Project SEOS (Science education through Earth Observation in High Schools - www.seos-project.eu) is a project funded by the European Commission in collaboration with the European Space Agency and UNESCO. We are developing web based tutorials on different topics to make science more attractive for high school students.

Your website is a really nice collection of very interesting facts! The information is very compact and the language is easy to understand for high school students.

We would certainly give full credit to the original source of the text!

Hoping for a positive answer,
Best wishes,

Christina Klose
